INSULIN MANAGEMENT FOR KIDS WITH DIABETES

Receiving a diagnosis of juvenile diabetes can be a stressful time for everyone in the family. As a caregiver, you want to choose an insulin delivery method that both addresses your child's evolving health needs while also granting him or her the freedom to be a normal kid.

The Omnipod® Insulin Management System was created for this very reason – to manage diabetes with as few disruptions to daily life as possible. Ranked the # 1 pediatric preferred insulin pump¹ for children of all ages with diabetes, the tubeless Omnipod® System is easy to use and allows caregivers and older kids to deliver and monitor insulin wirelessly.
